

Some vaccines, like the smallpox vaccine, actually work, and offer 50 to 75 years (or more) of immunity, for a disease that has a 33% death rate. There is no treatment or cure for smallpox.

Today, newly patented injectable therapies, designated as vaccines, claim to offer partial immunity for 8 months to 1 year. In an attempt to push these new expensive injections, the western governments are withholding treatments that could (according to the World Health Organization) lower the mortality rate by 83%. WHO-sponsored review of ivermectin trials indicates 83% reduction in Covid mortality.

Withholding treatment to sell a vaccine is wrong. This injection is so new, there is no way to know the long term reactions and death rates. In fact, it is estimated that restrictions used to prevent disease spread, instead of treating the disease with proven medications, have caused more deaths than the disease itself caused. Western governments, along with the oligarchs of the World Economic Forum, banks and corporations, are using a pandemic and vaccination passport / surveillance program, to facilitate Global Governance, AKA the Fourth Industrial Revolution, AKA the Great Reset. <https://www.weforum.org/agenda/2020/04/covid-19-emerging-technologies-are-now-critical-infrastructure-what-that-means-for-governance>
